Hypno-Chemo is not a therapy for Cancer it is a therapy to emotionally support clients that are suffering with extreme anxiety following a cancer diagnosis.

Obviously, cancer is a very emotive subject so please consider your clients objectives in all cases and of course adhere to the laws, bylaws and trading conditions of the country/area you practice in.

This program with your help can really help a lot of emotionally torn people find some focus and control in what is probably the most overwhelming journey of their life.

Good Luck...

Yours Sincerely
